# Vishwakarma University

Vishwakarma University (VU) is a natural offshoot of the Vishwakarma Group of Institutions' educational legacy spanning more than 35 years. The University has been established as a State Private University under the Government of Maharashtra in the year 2017. VU enjoys autonomy in designing and implementing its own curriculum, conduct examinations and award degrees.

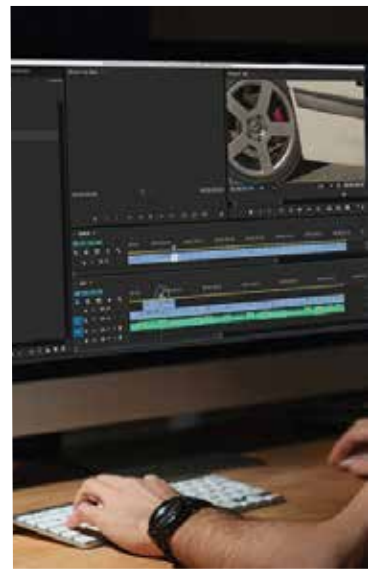

The University focuses on academic excellence, positively impacting student community and the society at large. The learning model at Vishwakarma University is the combination of the knowing, practicing, performing and reflecting. The "learning by doing" approach practiced through industry participation provides an opportunity for practical and pragmatic learning to students. Through industry backed enriched curriculum and ecosystem of holistic development, the university aims to prepare learners for fulfilling career paths.

The University is committed to empower students to embrace new challenges in the knowledge based economy and be prepared for industry requirement to be a valuable human asset. The focus is on education, innovation and skilling to impart values and prepare a competent student for the present and future who are relevant in terms of life and livelihood.

## Dawn Institute

Dawn Institute of Technical Arts is the knowledge partner of Vishwakarma University (VU), a State Private University under the Government of Maharashtra.

Dawn Institute of Technical Arts (DITA) is the vision of Narendra Bhide, Director of the renowned Dawn Studios in Pune. It is a manifestation of his aspiration to fulfil the lack of practical-oriented courses in professional media industry. When it comes to choosing a career in entertainment industry, one must know the nitty-gritties of working with audio, video and graphics. Dawn Institute is therefore a special institution which provides in-depth knowledge of industry practices and technical settings across major disciplines of media industry. Dawn institute offers courses and workshops in Sound Engineering and Video Editing. All the programs are designed to focus on practical difficulties and challenges faced in real world.

## Testimonials

“ I am a musician, so interested in learning recording techniques. Apart from the lectures and practicals, we were provided with online reference material, which helped me grasp concepts easily. Continuous evaluation and assignments helped me rectify my mistakes. ”

- Gandhar Kuvalekar

“ I am a guitarist so was interested in learning recording and mixing techniques. Here, in Dawn institute, we have access to Dawn Studios which are equipped with Avid pro tools HD system, the best part is from start we are given training in pro tools software which is used worldwide. ”

- Omkar Desai

“ When I came to the studio for the first time I was amazed to see various hardware processors. I feared after looking at them but after proper guidance from the faculty members, using these gears was like playing with a toy for me. The thing that differentiate this institute from other institutes is that this institute has the Dolby approved Studio which students can use for practical sessions. ”

- Samarth Kolekar

“ I was very curious about the role of a sound engineer in live concerts so I decided to learn sound engineering. Dawn institute is the correct place to learn sound engineering. Since I came from Marathi medium it was difficult for me to grasp technical concepts, which are Primitively in English. My classmates and instructors were really helpful in solving my problems. ”

- Gaurav Phatle

“ I am a classical musician. I was interested to know the process that goes in making a song. So I thought I will do a course in sound engineering. Since I am a musician I thought the course would be too technical for me but this course brought out a finer musician that was hidden inside me. The best part in this institute is I have access to world-class studio & on top of that I was allowed to use most of the high-end equipment there. ”

- Kaushik Bugdane
