In addition to the standard curriculum, students have the option to choose additional courses through specialisation tracks in the final year (semester 9 and semester 10). Students can decide not to choose any specialisation track or can choose any one track from the two specialisation options available (i.e. AI and Law OR Energy Laws). The specialisation track shall account for 8 credits. This presents a valuable opportunity for the students to enhance knowledge in emerging and niche legal domains such as AI and Law, and Energy Laws.
